

# A Certified GameChanger

Testing your long distance IP runs

# When the standard solution isn't enough

1Gb/s and PoE+ over 200 meters - That's a GameChanger

## Testing Beyond the 100 Meter Limit

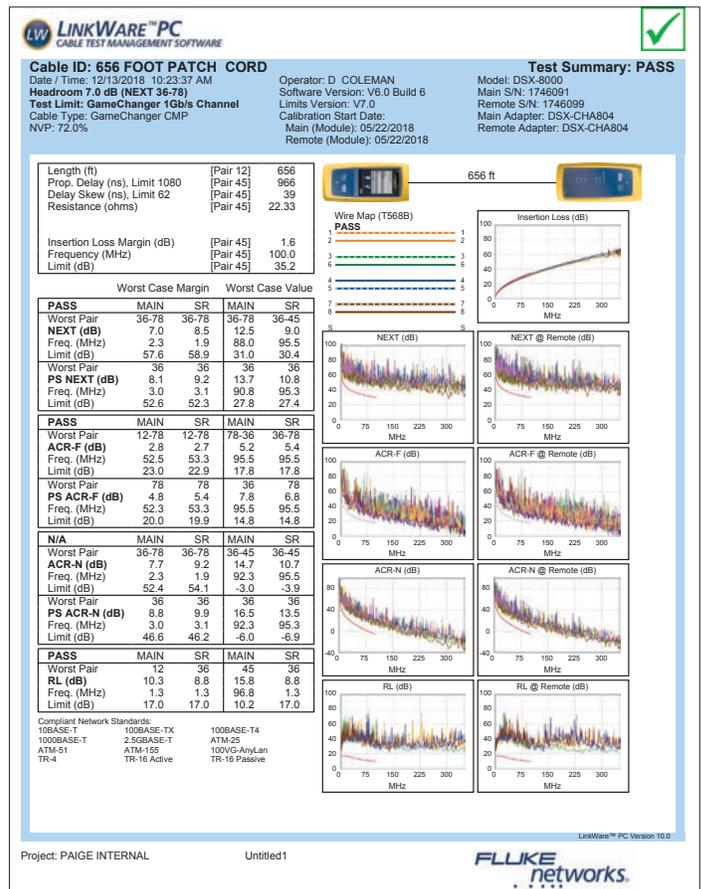

Whether you're submitting certified test results for the 25 Year GameChanger Warranty, or just looking to ensure the success of your installation, testing your long distance cabling channels has never been easier.

As of December 2018, the following companies support the testing of the GameChanger Cable. Additional support is being added regularly, for the most current list of supported devices, please visit [www.paigedatacom.com/#gc\\_testing](http://www.paigedatacom.com/#gc_testing)

- AEM Test Pro - v1.3.1 or higher
- Fluke DSX Cable Analyzer - v6.0 or higher
- Ideal Networks LanTEK III
- NETSCOUT OneTouch AT
- Softing WireXpert - v8.0 or higher
- Viavi T-BERD 5800v2; 5882; 5800-100G5

There are two Channel types that you can test for. The 1Gb/s Channel is for cable channels between 0-656 feet (0-200 meters). The second test is for 10Mb/s which is intended for cable runs between 657-850 feet (200-259 meters).

As a reminder, UL has verified our claims of 1Gb/s and PoE+ over 656 feet, and 10Mb/s and PoE+ over 850 feet. For more info on our UL verification visit [verify.ul.com](http://verify.ul.com)

An example of a passing result, on a 656 foot channel.

**GameChanger Part Numbers:**  
 258310333 - Riser, Yellow w/ Black Stripe  
 258300336 - Plenum, Blue w/ White Stripe  
 258300310 - Plenum, White  
 258330804 - OSP, Black  
 258340804 - OSP Shielded, Black
